Coin Collection System

Municipal Supply Sales Company is proud to offer the newest innovation in coin collections in decades!

With escalating rates comes more coins, more weight and the potential for more worker's compensation claims. We have a new cart/canister configuration that incorporates the best of the old such as folding handles and light weight carts with the new concept of sloped floors with sliding coin doors at the bottom/front of the canisters. Smaller canisters to minimize weight of each canister, but a cart that will hold two of these canisters, as a result you get less weight per "lift" to protect you from worker's comp problems while your collectors actually get more capacity for less return trips to the van or bank.

Cart with dual canisters

We also have a conveyor that will lift the coins from the self-emptying canisters up to your counter or sorter or even a bagging/scale station. Please call for more details.

Collection Cart Dimensions:

Side wheels are 12" solid heavy duty
Front caster(s) are 5" solid heavy duty fixed, not swivel
Canister is 5 1/2" W x 9" D x 20" H.
Holds approximately 10,000 quarters or \$2,500

Conveyor system lifts coins from self-emptying canister

Handle folds down for storage

See Reverse side for Product Pricing

Collection head assembly (shown) sold separately
